

LACCEI STUDENT CHAPTERS

The Student Chapters are an initiative of LACCEI, that had the support of the Institute of Electrical and Electronics Engineers (IEEE) and the Student Platform for Engineering Education Development (SPEED).

The student chapters are born with the objective of uniting the participants, an international family made up of peers, academics and professionals belonging to the institutions of the consortium that can accompany them in the course of their program. They will be also a tool to create ties that allow its members to become familiar with an organization whose operation will be like that of similar institutions, with which they will interact as professionals. With the chapters, the students can develop their leadership skills, working towards the construction of social relationships with colleagues, academic leaders, and professionals to facilitate the execution and participation of students in face-to-face trainings and webinars, access to mentors, participation in competitions and visits to industrial and business facilities, access to LACCEI publications and the creation of joint programs and projects.

BUSINESS INCUBATORS

LEIRD 2021

Multiconferencia Internacional en Emprendimiento,
Innovación y Desarrollo Regional de LACCEI
"Ideas para Superar y Emerger de la Crisis de la Pandemia"

Diciembre 9 – 10, 2021

Startup Accelerators

LEIRD2021 is a first level multidisciplinary event in Entrepreneurship, Innovation and Regional Development, it is a stage to present and discuss innovations, latest trends, as well as challenges and proposed solutions.

Within the framework of the Conference there will be a special space dedicated to Incubators, where they will be able to present their success stories.

Success is contagious: the success stories of Incubators, startup accelerators and entrepreneurship support programs always interest and motivate us all. At LEIRD 2021, it will be possible to present and publish these types of stories.

A unique opportunity

The conference will take place under the theme "Ideas to overcome and overcome the crisis created by the pandemic." Representatives of international organizations - such as the Organization of American States, the Development Bank of Latin America and the United Nations Economic Commission

for Latin America, among others - will present us with a comprehensive overview of regional economic development in relation to the resulting situation of the pandemic. Members of different non-governmental organizations will share their views on entrepreneurship and innovation, in relation to education, government policies, and trends in support programs such as incubators and startup accelerators.

MATILDA 3 LAUNCH

The book "Matilda and Women in Engineering in Latin America 3" was launched with great success, published in digital format and available on the LACCEI website for reading and downloading.

Download and read: <https://laccei.org/blog/matilda-iii/>

The event had its presentation on Wednesday, September 22, at 6:15 p.m. Colombia time, within the framework of the ACOFI International Meeting on Engineering Education. This year the first face-to-face meeting was held of the Latin American Open Chair Matilda and women in engineering, editor of the book.

"We have worked hardy, and we are sure that the product is very interesting. We want to highlight the work of the Editorial Committee, the reviewers and all the collaborators who made it possible to meet the planned schedule".
