

LACCEI 2020, BUENOS AIRES

IMPORTANT COMMUNICATION:

Consistent with the global pandemic reality that is affecting us and trusting that in the next few months the effects will lessen, we have decided to provisionally *maintain the dates initially established for the LACCEI 2020 Conference*, to be held in Buenos Aires, Argentina, to from July 29th to 31st of this year.

If the world situation and good sense require us to vary the established dates, the event would be postponed on dates to be announced well in advanced. However, the cancellation of the conference is not on our agenda.

We appreciate your valuable attention, collaboration and fidelity to the LACCEI fundamental purposes and objectives.

A big hug of solidarity to this great LACCEI family.

WEBINAR, WEDNESDAY MARCH 25th

LACCEI and the Observatory of Educational Innovation, of TECNOLÓGICO DE MONTERREY, launch their first webinar in the series "The role of women in engineering and science"

This webinar will focus on the importance of adding experts in the teaching of mathematics to improve education at all educational levels. Professor Ruth Rodríguez will present

relevant data that allow us to understand the current situation to better understand this problem in different contexts. She will also share inspiring success stories, as well as tips and best practices done in this direction. It is expected that the public will know about the current affairs of the subject, we also hope to hear similar experiences in other latitudes that allow us to join forces and improve the situation in the years to come and with it, motivate and promote a greater number of young people to enter the STEM areas not only in science but in engineering, mathematics and technology.

"*The role of women in engineering and science*" is a series of three webinars where you will learn about the advances, challenges and obstacles that girls, adolescents and women face at the beginning and during their studies in STEM careers (Science, Technology, Engineering and Mathematics) in Mexico and Latin America. You will also learn about the efforts made to promote gender equality, as well as national and international initiatives that seek to boost the number of women in these areas of study and of research professors in STEM areas.

PROTECT YOURSELF FOR CORONAVIRUS

- Clean your hands every 20 minutes
- Wash your hands with soap and water for at least 20 seconds, especially after you've been in a public place, or after blowing your nose, coughing, or sneezing
- Avoid touching your eyes, nose, and mouth with your unwashed hands
- Avoid close contact with people who are sick
- Maintain a distance of at least 1 meter between you and others
- Stay home if you are sick
- Cover your mouth and nose with a disposable tissue when you cough or sneeze, or use the inside of your elbow
- Dispose used disposable tissues in the trash immediately
- After coughing or sneezing, immediately wash your hands with soap and water for at least 40 seconds
- Wear a mask if you are sick
- If you are NOT sick: You do not need to wear a mask unless you are taking care for someone who is sick
- Clean and disinfect frequently touched surfaces
- If surfaces are dirty, clean them using soap and water or detergent before disinfecting

Remember that the registration for LACCEI 2020 conference is already open:
