

LEIRD 2021 MULTICONFERENCE

LEIRD2021 consists of a first-class multidisciplinary event in which researchers, educators, and professionals active in various aspects and roles in **Entrepreneurship, Innovation and Regional Development** will be able to present and discuss innovations, latest trends, as well as challenges and proposed solutions.

This conference will bring together academics and leaders of programs to encourage and support Entrepreneurship, Innovation and Regional Development, to exchange and share their experiences and research results in all aspects of this topic.

Students from all disciplines and institutions will have a special space in this event, being able to participate in the International Competition for Student Entrepreneurship and Innovation Projects.

LACCEI's experience in organizing conferences together with the quality of the platform provided by AGORA MEETINGS, guarantee the effectiveness and quality of this virtual event that will have broad international participation.

INTERNATIONAL STUDENT COMPETITION

The International Competition of Student Entrepreneurship and Innovation Projects aims to motivate the entrepreneurial spirit among university students and stimulate the achievement of their academic objectives through the development of innovative entrepreneurship projects.

Who can participate?

Teams of up to four active college students who can be from different disciplines or specializations. These must be endorsed by a mentor professor from the institution where the lead student is enrolled.

Contest Phases

In **Phase 1** is required to write a text describing the project. The authors of the best evaluated works will be the finalists and will continue to **Phase 2**. This will consist of the preparation of a short video presenting the project and a virtual interview with the jury during the LEIRD2021 conference next December.

Recognition of students

There will be four winning teams among the finalists. The first three will receive cash prizes and all the members of these teams will receive free registrations to participate virtually in the next LEIRD 2122 conference. Optionally, they will be able to receive specialized mentoring for the development of their business initiatives. All finalists will receive a diploma of recognition, as well as the institution they represent.

LANZAMIENTO GLOBAL CAPÍTULOS ESTUDIANTILES LACCEI

The Latin American and Caribbean Consortium of Engineering Institutions - LACCEI, carried out with great success and numerous attendances on August 27, the **Global Launch of its Student Chapters**, guided by its Vice President, Dr. Libis Valdez Cervantes. The student chapters is a strategic initiative that seeks to strengthen the leadership competencies in engineering students through training, access to mentors, LACCEI publications, participation in competitions and competitions, mobility, joint projects, international internships and development of open chairs in institutions that have effectively created chapters. This has been a joint work with the Institute of Electrical and Electronics Engineers (IEEE) and the Student Platform for Engineering Education Development (SPEED).
