XII IBEROAMERICAN MEETING OF EDUCATION IN ENGINEERING

Between November 4th and 6th of this year, the XII IBEROAMERICAN MEETING OF EDUCATION IN ENGINEERING was held at the Autonomous University of San Luis Potosí, Mexico, where members and special guests from nine countries of the region attended. The core topic revolved around the training of engineers to face the challenges in this new era and the future actions of Latin America.

The themes of the event passed on the following transversal axes:

- Current and future problems in generating employment for engineers
- Challenges of institutions to train engineers with quality and relevance
- Face-to-face, distance and virtual education, Innovation, Entrepreneurship and Internationalization.

Delegates from Argentina, Chile, Portugal, Mexico, Spain and Colombia participated in topics on “**New modalities in the training of engineers associated with new technologies**”.

On topics of “**Innovative curricular structures for the training of engineers**”, colleagues from Brazil, Ecuador, Portugal, Colombia and Argentina participated. In the “**New challenges to train engineers with quality and relevance**” the panel was formed by delegates from Mexico, Portugal, Spain, Mexico, Argentina and the Executive Director of LACCEI, Dr. María Larrondo Petrie.

Welcome!!
