

BULLETIN 046, MARCH 2024

LACCEI 3D PROJECT

The LACCEI 3D (Double Diplomas and Doctorates) project consists of managing joint programs through our network.

To do this, the obstacles, and experiences that the coordinators of these programs (Master's Degrees/Degrees and Doctorates) encounter or have encountered are analyzed in order to propose a model to follow.

The objective is that, during a year of activities, through seminars, surveys, and analysis we can share experiences so that our institutions can overcome the difficulties they may encounter when developing a joint double degree program.

Through the result, LACCEI (for this year) will have a guide on the entire process. Four meetings have been held since the previous year.

The last International Meeting of the Double and Triple Degree Project was held in a hybrid manner in the city of Boca Raton, Florida, on March 7 and 8, where many in-person and virtual participants from member universities gathered. with the purpose that they can strengthen their Curriculum Internationalization processes, fundamental to preparing students for a diverse and globalized world, promoting intercultural understanding, and fostering academic excellence and innovation among our institutions.

This project will continue to develop for several months and at the LACCEI 2024 Multiconference in Costa Rica, the conclusions will be presented, a guide will be established and the actions to follow in this very important initiative for members and associates will be presented.

NEW PRESIDENT OF CONDEFI CHILE

Dr. Jorge Farias is elected president of the Corporation of Engineering Faculties of Chile

The Dean of the Faculty of Engineering and Sciences of the University of La Frontera (UFRO), Dr. Jorge Farias, will preside over the board of directors of the Corporation of Engineering Faculties of Chile (CONDEFI) for two years, being the first time that this house of studies leads this instance.

Dr Jorge Farias, Dean of the Faculty of Engineering, Universidad de la Frontera

For two years, Dr Jorge Farias Avendaño, dean of the Faculty of Engineering and Sciences of the University of La Frontera (UFRO), a member institution of LACCEI, will chair the board of directors of the Corporation of Engineering Faculties of Chile (CONDEFI.), a non-profit entity that brings together 35 universities in the country, both public and private.

Part of the objectives of this organization is to contribute to the development of engineering faculties, schools or academic units in Chile, a joint effort that contemplates the lifting of actions that promote quality academic training of engineers, the continuing education necessary to the acquisition of new knowledge and skills, the development of engineering research and a continuous improvement of institutional management.

Sharing that view, Dr Jorge Farias accepts this new challenge, which he describes as a great opportunity to also make visible and position even more the work carried out by the Faculty of Engineering and Sciences of the UFRO.

In his words, he says "with great satisfaction and joy I assume the responsibility of leading this corporation, representing the deans of engineering in the country, a challenge that, for us, as a faculty and university, stands as an important showcase to continue transcending." at the national level".

LACCEI 2024, IMPORTANT DATES

April 21, 2024: **New Deadline** for Master and Doctoral Thesis (Eastern Daylight Time – EDT)

April 26, 2024: Notification of acceptance (FP & WP)

May 2, 2024: Submit final version of the accepted paper (FP & WP)

May 6, 2024: **Only virtual mode:** Deadline to submit video

May 7, 2024: Early bird registration closes

May 8, 2024: Standard (full cost) registration open

May 29, 2024: Publication of the Face-to-Face (in person) program

May 29, 2024: Publication of the Virtual program

June 30, 2024: Standard registration closes

July 1, 2024: On Door (plus 10%) registration open

July 15-16, 2024: Preconference LACCEI 2024
